Preface	xi
1 Flexible Plastic Packaging and Recycling	1
1.1 Definition of Flexible Packaging.....	1
1.2 Flexible Packaging Categories	1
1.3 Selection Criteria of Flexible Packaging.....	2
1.4 Benefits of Flexible Plastic Packaging	3
1.5 Flexible Packaging versus Rigid Packaging	4
1.6 Limitations of Flexible Plastic Packaging.....	5
1.6.1 The Problem of Flexible Multilayer Plastic Packaging ..	6
1.7 Recycling	7
1.7.1 Types of Recycling	10
1.8 Life Cycle Analysis	12
References.....	17
2 Environmental and Socio-Economic Effects.....	21
2.1 Description of the Problem.....	21
2.2 Degradation of Plastics in the Environment	22
2.2.1 Environmental Degradation Modes	22
2.2.2 Hydrolytic Degradation	23
2.2.3 Thermooxidative Degradation	24
2.2.4 Photodegradation	24
2.2.5 Biodegradation	27
2.2.6 Mechanical Degradation	32
2.2.7 Combined Degradation Processes	32
2.3 Environmental Effects in Land.....	34
2.4 Environmental Effects at Sea	34
2.4.1 Entanglement	35
2.4.2 Ingestion.....	36
2.4.3 Rafting.....	39
2.4.4 Loss of Biodiversity and Habitat.....	39

2.4.5 Toxicity	40
2.5 Socio-Economic Effects	41
2.5.1 Tourism	42
2.5.2 Aesthetics	43
2.5.3 Human Health	44
References.....	44
3 Polymers Used in Flexible Packaging.....	57
3.1 Types of Polymers	57
3.2 Polyolefins.....	57
3.2.1 Polyethylenes	58
3.2.2 Polypropylene	63
3.3 Polystyrene.....	67
3.4 Chloropolymers.....	67
3.4.1 Poly(Vinyl Chloride) (Plasticized)	67
3.4.2 Poly(Vinylidene Chloride).....	68
3.5 Poly(Vinyl Alcohol).....	69
3.6 Polyesters	70
3.6.1 Aromatic Polyesters	70
3.6.2 Aliphatic Polyesters	71
3.7 Polyamides.....	73
3.7.1 Polyamide 6	74
3.7.2 Polyamide 66	75
3.7.3 Nylon-MXD6	76
3.8 Polysaccharides.....	76
3.8.1 Cellulose and its Derivatives	78
3.8.2 Starch	79
3.8.3 Chitin/Chitosan	79
3.9 Blends of Polymers.....	80
3.10 Polymers Used as Adhesives and Tie Layers	83
3.11 Polymers Used as Coatings/Sealants.....	83
3.12 Polymers Used as Inks.....	86
References.....	86
Patents	93

- 4 Types, Forms, and Uses of Flexible Plastic Packaging..... 97**
 - 4.1 Types of Flexible Plastic Packaging.....97
 - 4.1.1 Monolayers.....97
 - 4.1.2 Multilayers 98
 - 4.1.3 Metalized and Metal Foil Containing Films 103
 - 4.2 Forms of Flexible Plastic Packaging105
 - 4.2.1 Bags.....105
 - 4.2.2 Wraps 105
 - 4.2.3 Pouches, Sachets.....109
 - 4.2.4 Air Pillows and Envelopes.....114
 - 4.2.5 Labels and Sleeves.....115
 - 4.2.6 Straps/Tapes/Six-Pack Rings 120
 - 4.2.7 Net Bags and Woven Bags/Sacks.....120
 - 4.2.8 Coated/Printed Films 121
 - 4.3 Applications of Flexible Plastic Packaging.....122
 - 4.3.1 Food and Beverage 123
 - 4.3.2 Cleaning Products 123
 - 4.3.3 Medical/Personal Care/Cosmetics 125
 - 4.3.4 Construction and Building.....127
 - 4.3.5 E-Commerce 129
 - References.....130
 - Patents134
- 5 Collection and Feedback 139**
 - 5.1 Collection139
 - 5.2 Sources of Flexible Plastic Packaging Waste139
 - 5.2.1 Postconsumer Flexible Plastic Packaging 140
 - 5.2.2 Postcommercial Flexible Plastic Packaging.....146
 - 5.2.3 Postindustrial Flexible Plastic Packaging.....146
 - References.....157
 - Patents160
- 6 Separation/Sorting and Volume Reduction..... 163**
 - 6.1 Separation/Sorting.....163
 - 6.1.1 Manual and Vacuum-Assisted Manual Sorting..... 164
 - 6.1.2 Air Separators 166
 - 6.1.3 Screens 170

6.1.4	Grabbers	171
6.1.5	Marking and Labeling Systems	180
6.1.6	Optical Sorters	185
6.1.7	Robotic Sorters	189
6.1.8	Eddy Current Separators	191
6.2	Volume Reduction	192
6.2.1	Compacting	192
6.2.2	Softening or Melting the Outer Surface of Compacted Waste	194
6.2.3	Bales	199
	References	202
	Patents	206
7	Solvent- and/or Chemical Agent-Based Separation	211
7.1	Stripping	211
7.2	Cleaning Solutions	231
7.3	Selective Dissolution	234
	References	252
	Patents	253
8	Post-processing and Reuse	265
8.1	Cleaning	265
8.1.1	Wet Cleaning	265
8.1.2	Dry Cleaning	276
8.2	Size Reduction	278
8.2.1	Shredders	278
8.2.2	Granulators	287
8.3	Agglomeration	291
8.4	Density/Gravity Techniques	294
8.4.1	Float-Sink	295
8.4.2	Hydrocyclones	297
8.5	Extrusion	301
8.6	Integrated Systems	305
8.7	Blending	310
8.7.1	Compatibilization	311
8.7.2	Solid-State Shear Pulverization	316
8.8	Compounding	318

- 8.9 Reuse321
 - 8.9.1 Recycled Products.....321
 - 8.9.2 Commercial Uses325
- References.....326
- Patents330
- 9 Chemical Recycling..... 343**
 - 9.1 Types of Chemical Recycling.....343
 - 9.2 Solvolysis344
 - 9.2.1 Hydrolysis344
 - 9.2.2 Aminolysis/Ammoniolysis.....346
 - 9.2.3 Alcoholysis.....346
 - 9.2.4 Glycolysis.....347
 - 9.3 Oxidative and Catalytic Depolymerization348
 - 9.4 Chemical Pyrolysis350
 - 9.5 Enzymatic Depolymerization352
 - 9.6 Recovery Options.....353
 - 9.6.1 Incineration353
 - 9.6.2 Waste-to-Energy.....355
 - 9.6.3 Pyrolysis.....356
 - 9.6.4 Gasification359
 - References.....360
 - Patents362
- 10 Legislation and Regulatory Framework 369**
 - 10.1 EU Packaging Waste Legislation369
 - 10.2 EU Regulations on Plastic and Recycled Plastic Materials Intended to Come into Contact with Food372
 - 10.3 Regulative Measures in Other Countries.....376
 - 10.3.1 China376
 - 10.3.2 India377
 - 10.3.3 Southeast Asia.....378
 - 10.3.4 United States378
 - 10.3.5 United Kingdom379

- 10.4 Regulatory Frameworks.....379
 - 10.4.1 Sustainable Materials Management..... 380
 - 10.4.2 Circular Economy380
 - 10.4.3 Extended Producer Responsibility..... 383
- 10.5 Awareness Raising384
- References.....387

- 11 Economic Evaluation and Trends 395**
 - 11.1 Market of Flexible Plastic Packaging.....395
 - 11.2 Economic Evaluations of Recycling395
 - 11.3 Markets of Recycled Flexible Plastic Packaging.....396
 - 11.4 Trends and Proposals398
 - 11.4.1 Redesign..... 398
 - 11.4.2 Increase Collection 404
 - 11.4.3 Improve Sorting 405
 - 11.4.4 New Recycling Technologies 406
 - 11.4.5 Bioplastics 408
 - 11.4.6 Recycled and Reused Packaging 416
 - 11.4.7 Legislative Initiatives and Policy
Recommendations..... 419
 - 11.5 Projects.....420
 - 11.6 Initiatives.....423
 - References.....427
 - Patents437

- Index 439
